INTUITIVE SOFTWARE FOR YOUR BUSINESS

Help your business work more efficiently and smoothly with a secure, cloud-based, single eco-system which is customisable for your company.

ThunderBolt has been developed using Microsoft's .NET CORE framework. This is engineered with the latest SQL database which applies advanced intelligence throughout the ThunderBolt applications which you will use for your day to day operations.

Each ThunderBolt platform we deliver, consists of several modular services and applications that are completely customisable for your business.

CUSTOMISABLE

Your system can be tailored uniquely for your company's operations

INTEGRATE

You can easily bolt on other ThunderBolt apps into your new system

SOFTWARE COMPARISON

ThunderBolt Software Vs SaaS Products Vs Custom Development

TYPICAL SAAS SOFTWARE

Ridiculously Low Cost

- ✗ Not Customisable
- ✗ Do not own the platform
- ✗ Do not own the code
- ✗ Do not own your data
- ✗ Hundreds of thousands of staff from multiple companies using the same server's bandwidth
- ✗ At the mercy of the original developers staying in business

THUNDERBOLT SOFTWARE

Reasonable One Off Cost

- ✓ System is already developed and tested
- ✓ Add on a number of developed software solutions
- ✓ Completely Customisable
- ✓ Integratable with third party services
- ✓ APIs ready for your web developer
- ✓ You own the platform
- ✓ You own the code
- ✓ You own your data
- ✓ Only your staff using the server's bandwidth
- ✓ Migrate your current data
- ✓ You can host on our server

CUSTOM SOFTWARE DEVELOPMENT

Ridiculously High Initial Cost

- ✗ You will need to think of every feature you want developed
- ✗ You will be responsible for testing the entire system
- ✗ Only Customisable at the time of development

THUNDERBOLT HAS YOU COVERED

EXCEPTIONALLY RELIABLE SUPPORT FOR YOUR BUSINESS

ADAPTIVE CUSTOMISATION

The way your business operates is unique, which is why we offer Adaptive Customisation when you purchase ThunderBolt. With Adaptive Customisation, our team will tailor ThunderBolt to precisely match the specific needs and requirements of your business.

EARLY LIFE SUPPORT

The launch of ThunderBolt should be a pivotal moment for your business. So that is why we offer Early Life Support with every purchase of ThunderBolt. It is designed to provide you with fast assistance and expert guidance during this critical phase.

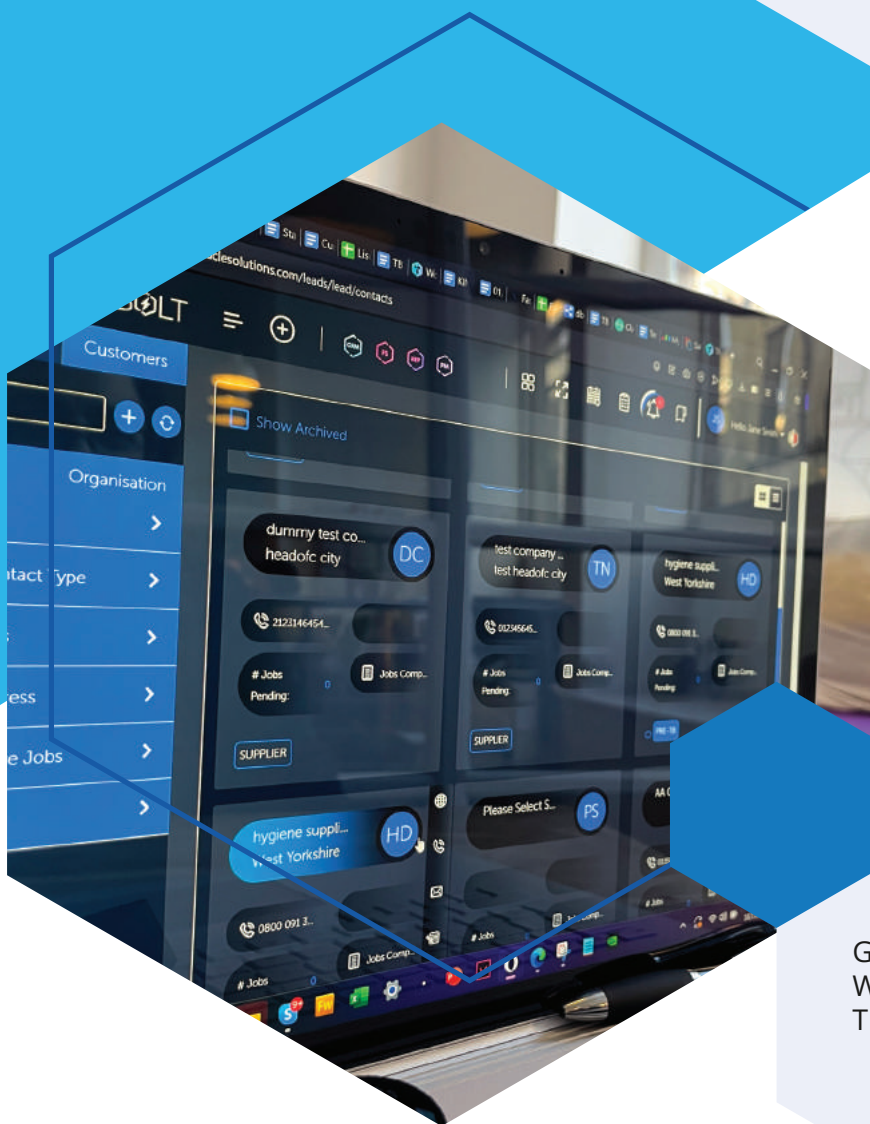

RUNNING OPERATIONAL SUPPORT

After your Early Life Support ends, you can still reach our support anytime via phone, email and there is even a support window within the ThunderBolt system where any issues reported will raise a ticket with our super support team.

GET THE BEST AND SAFEST IT ADVICE FOR YOUR BUSINESS WITH OUR CONSULTANTS.

INTRODUCING YOUR THUNDERBOLT APP

How ThunderBolt Helped Ireland based Easyways

Easyways wanted to replace their “creaking” 15-year-old Access database and spreadsheets with ThunderBolt’s cloud-based SQL system. The effectiveness and efficiency of Easyway’s daily operations was suffering due to the struggling access database. Also, as their business grew, many of their operations were being carried out on spreadsheets.

Firstly, our team got to work in transferring over all the historical data into ThunderBolt’s database. We then customised certain screens and functionality to ensure the system maintained the same flow of operations that Easyways were used to.

I would emphasise that at all times Tentacle progressed the work and resolved problems in a very positive and polite manner. I would highly recommend ThunderBolt software and the team at Tentacle as a whole to anyone who requires a comprehensive management system for their business operation.

- Andrew Fernie, Easyways

- ✓ Server Hosting

Data Migration

Your current database will be in safe hands as our team will manage your data migration to ThunderBolt. With our "No Data Left Behind" policy, we promise to keep the process pain free for you.

FAQs

Is this a SaaS or Custom Software product?

It is the best of both worlds. It is better to think of ThunderBolt as in between the two extremes of SaaS and Custom Software. With SaaS, you are one of many people using the software which means that you do not own the code or data. With Custom Software, you have to start from scratch and this will include a much higher cost. With ThunderBolt, you can customise modules and applications that have already been developed and tested. Also, with ThunderBolt, you own the code and data.

Will we be sacrificing any features or functionality by moving away from a SaaS solution?

The major difference your staff will notice is the user interface. However, there are many reasons ThunderBolt is better than your current SaaS solution. You will find the biggest reason for choosing ThunderBolt is that your staff are not using the same platform as other companies. This means your staff will not find any bandwidth or memory issues. Also, you are not constrained by monthly licence fees nor by the fact that your sensitive data is being held along with hundreds of other companies' data. Finally, the entire platform will be branded and customised for your company which in essence means that it will become one of your company's most valuable assets.

How will our user facing website be integrated?

ThunderBolt comes integrated with a comprehensive list of API libraries. Our APIs will help your web developers fluidly integrate with the data and functionality in your ThunderBolt Software.

Who will control the data we upload into ThunderBolt?

ThunderBolt Software has an easy to use data uploader which will allow you to take your historic data and upload into your new system within minutes.

Can we add other ThunderBolt apps after we deploy?

Yes. At any time you can "bolt" on other ThunderBolt applications with no downtime to your current software.

Is it possible to leave ThunderBolt Software and take all of my company's data?

ThunderBolt Software belongs to you and of course if you want to stop using it, you can. All the data is still yours which can be downloaded 24/7.

We would like to discuss our project - what is the best way forward?

Get in touch with our sales team today and they will arrange a demo of the system for you over a video call. From there, they will discuss what aspects you can customise and your delivery options.

Who will host ThunderBolt?

You can either choose to host ThunderBolt Software on your own server or you can get Tentacle to host for you. You can also at any point change servers.

Are we tied to Tentacle Solutions for our future development?

The advantage to selecting ThunderBolt is that you will always be in control of your system's code and data. This means you will be able to easily move your system to another provider/development company.
